IMPORTER & TRADER

A photograph of a desert landscape. A two-lane asphalt road with yellow double lines curves through the foreground. In the background, there are large, rugged red rock formations under a sky with warm, orange and yellow hues, suggesting a sunset or sunrise. The image is partially obscured by a dark grey diagonal shape in the bottom left corner.

The company focuses on simple, dependable service that supports transporters, industrial units, and commercial buyers who need steady and hassle-free petroleum products supply.

PRATIK PETRO

OUR VISION

VISION

Our vision is to become a trusted leader in bitumen and Bituminous products by delivering innovative, sustainable, and high-quality products. We aim to support stronger and smarter infrastructure across the country while contributing to long-term national growth. Our focus is on creating solutions that improve reliability, performance, and durability in every project we serve.

PRATIK PETRO

OUR MISSION

MISSION

Our mission is to supply high-performance bitumen and related products that match the fast-changing demands of construction and industry. We commit to quality by investing in modern technology, advanced testing, and strict process control. At every step, we work with a focus on sustainability, ensuring our operations stay safe for the environment. We aim to build lasting relationships through honest communication, dependable service, and on-time delivery, while encouraging our team and partners to grow through innovation and continuous improvement.

QUALITY & TECHNICAL SUPPORT

COMPANY

We are pleased to confirm that a testing certificate, often referred to as a Certificate of Analysis (CoA), is provided with every batch of material you receive. This certificate confirms that the material has undergone rigorous testing and meets all specified quality control standards and product specifications.

PRATIK PETRO

STORAGE

Storing materials at a Container Freight Station (CFS) at Kandla Port means you are using a specialized, secure warehouse to hold goods that are either awaiting export or have recently been imported. This process involves consolidation or deconsolidation of cargo, and the CFS is responsible for handling the logistics, including storage, security, and customs clearance facilitation. You will pay storage and handling charges based on the type and volume of goods you are storing.

Page N°: 3 / 4

Quantity:

The total quantity stuffed into 25x20 ft. containers was as follows:

Total loaded container	: 25	Containers
Total loaded drums	: 2,750	Drums

Sampling:

Sampling was performed during the stuffing operation from 15 randomly selected drums, according to the ASTM Method D-140M-09 (Standard Practice for Sampling Bituminous Materials). Due to presenting cargo already packed in drums at the time of inspection, we've been restricted to taking the increments from the top level of drums only.

All drawn samples were mixed well and 5x1 L. Composite samples were prepared; and distributed as follows:

- 1x1 L. composite sample was dispatched to a non-SGS lab with SGS seal No. 935624
- 4x1 L. composite samples were retained by SGS for 90 days with SGS seal Nos. 935625, 935626, 935627, 935628

Analysis:

One composite sample was sent to a non-SGS laboratory for testing. The following results were presented by the laboratory:

TEST / PROPERTY	TEST METHOD	RESULT	SPECIFICATION RANGE DECLARED BY PRINCIPAL
PENETRATION AT 25°C, 0.1MM	ASTM D 5	40	35 MIN
